

A Parent's Guide to Evidence Me.

Evidence Me is digital platform that lets teachers keep in touch with children remotely. Teachers can set assignments for children to complete at home. Pupils can share their learning from home with the class teachers and their teacher can respond to the work they complete. All of this can be accessed by your child by simply logging in to Evidence Me using a password of your choosing.

(For further information on this, please refer to the Remote Learning Plan, Remote Learning Policy, Safeguarding Policy, Acceptable Usage Policy and GDPR Policy).

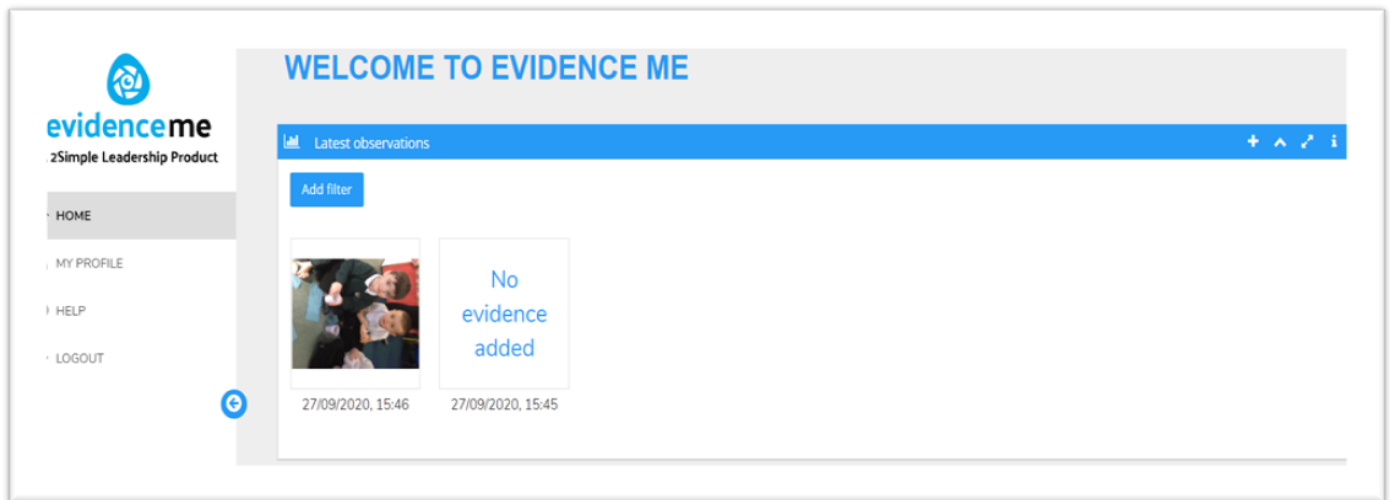

Parish staff in EYFS will use Evidence Me for home study on a weekly basis with home study tasks, based on the class Rainbow Folder.

Class teachers will also use Evidence Me to set activities during individual isolation or whole class isolation/closure. Activities will be posted to Evidence Me on a daily basis with pupils expected to respond to each activity by posting their complete work. This can be done by printing work and photographing it, completing work in your home learning book, photographing, uploading or using the writing tools built into Evidence Me. Teachers can then review the work completed.

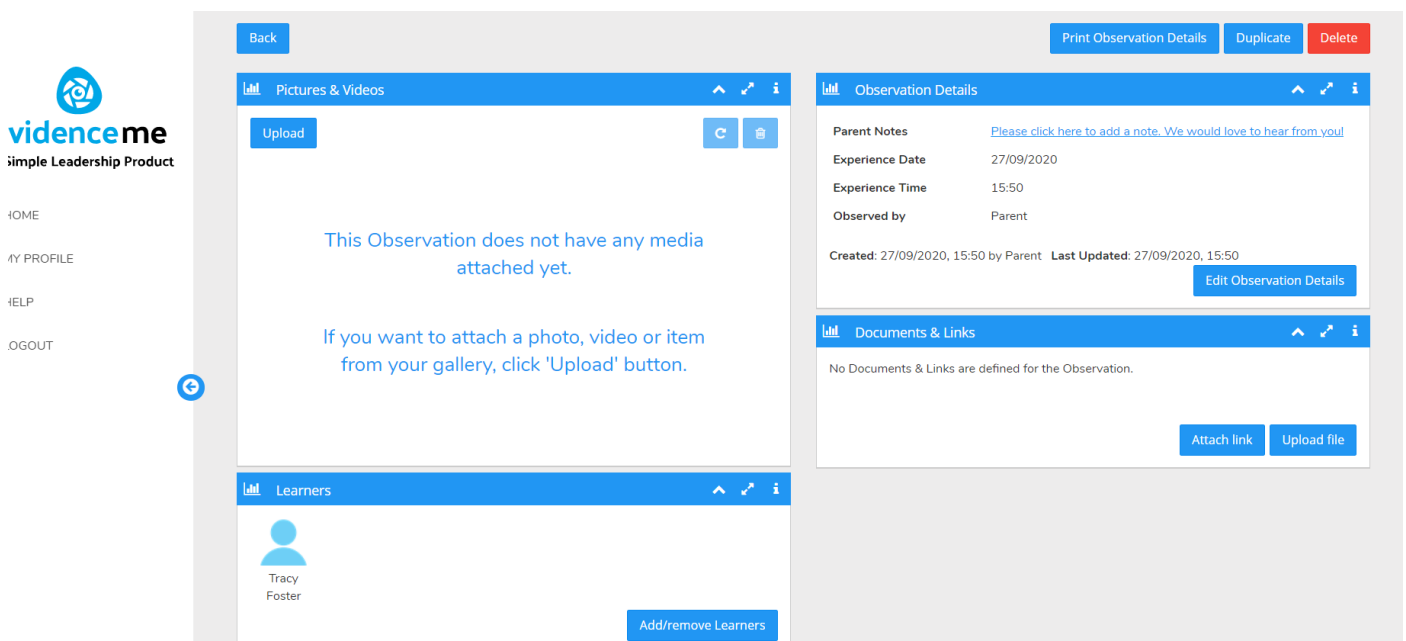

In the event of a child, or class, self-isolating (Tier 2 or Tier 3 of our remote learning plan) class teachers will post the relevant learning activities between 3pm and 5pm of the day before the activities need to be completed – this will give you and your child time to familiarise yourselves with the activities before they need to be completed. *Please ensure that your child does not complete the activities before they are needed.* Other home learning activities can continue to be shared during this time.

What does the Evidence Me Interface look like?

The home page is below. This will show all of your observations from home. To add an observation or activity click on '+'

Once you have clicked the '+' button, you can upload pictures and videos, add parent notes and any documents you may have created on a laptop. Remember to click save after every addition!

Teacher Responses

Your child's class teacher will see all the activity responses and will respond to them. This may be a general comment but may also include areas to develop further or some next steps in learning.

Please note, Teachers will approve posts that link to learning that has happened at home. They may not approve all posts from children. Please see our Teams and Evidence Me Contract for a guide on which posts may not be approved.
